DETAILED ACTION

Response to Amendment

The after-Final amendment filed on July 15, 2005 1.131 is sufficient to overcome the prior art reference.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-Claim 12, line 7, "*A guide control unit*" changed to read **—said guide control unit—**

Allowable Subject Matter

Claims 12-18 are allowed.

The following is an Examiner's statement of reasons for allowance: As noted in the Final Office Action, the prior art of record does not disclose or fairly suggest a tool table comprising *trolley rails mounted about the circumference of the base or a trolley connected to the guide control unit* in combination with the rest of the claimed limitations as set forth in claim 18.

Further, the prior art of record does not disclose or fairly suggest a tool table comprising *an upper plate and lower plate pivotally connected to each other to form a guide control unit* in combination with the rest of the claimed limitations as set forth in claim 12.

The prior art reference, Wiley discloses a tool table comprising: a table top assembly (10) a rectangular base assembly (24), a guide control unit and extendible work supports (22,23; figs. 1, 2); a portable table tool support bracket (fig.5) and a gear/(return & drive) sprocket assembly (146,148,150,152,154), hand crank (156) and chain (148) connected to the base in communication with the guide control unit (fig. 1), an adjustment lock (40, 42, 44, 46, 48) connected between the hand crank and the sprocket (fig. 5), a drive shaft connected between the hand crank(156) and the drive sprocket (152). Wiley is silent to any trolley rails or trolley connected to the guide control unit. Further, Wiley is silent to a pivotally attached upper and lower plate forming a guide control unit. Accordingly, Wiley fails to disclose or fairly suggest the invention as set forth in claims 12 and 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
